

SPACE DISINFECTANT WITH A LONG-LASTING EFFECT

Product description

This product is designed for general disinfection of frequented spaces, focused on maximum reduction and elimination of viruses, bacteria, fungi, allergens and mites. The treated spaces become disinfected and clean for users and the disinfectants have a long-lasting effect (up to three weeks, if used properly).

Who it is intended for

For anyone who cares about the health of all persons in the place where they work or live.

For anyone who owns or runs properties (office buildings, hotels and any other accommodation facilities, educational institutions, production facilities, banks, cultural and sports facilities, hospitals and medical facilities and food industry facilities) even if only partly.

For anyone who has to keep such places safe and healthy in the long term.

What the client gets

- A safe space – prevention of epidemics
- Disinfection done by specialists in the place of potential occurrence of undesirable micro-organisms anywhere in the Czech Republic.
- Air and surface disinfection
- Non-infectious environment and long-term protection against micro-organisms and fungi.
- Up to three weeks of protection, if the disinfectant is used properly.
- Application by an electric aerosol generator, which ensures maximum penetrability even in hidden or badly accessible places (including ceilings).

- “Active” surface with a polymer layer which eliminates the aforementioned extraneous substances.
- Treated surfaces, such as tables, armrests of chairs, computer screens, keyboards, mice, printers, etc.
- Undamaged surface – it does not react with plastics, wood and other materials, it is not corrosive, and the treated surface does not change colour.

Product parameters

- The product is used by employees trained to work with the generator and with the disinfectant.
- It is advisable to repeat the treatment regularly in frequented facilities, such as schools, office buildings, banks and production facilities.
- The disinfectant is chlorine-free. It is harmless to people, animals and the environment.
- It is inflammable and non-corrosive and does not contain any chlorine, alcohol, aldehydes or phenols.
- It is not irritant to skin and does not damage any materials. It leaves no unpleasant smell.

What we need to know to prepare an offer for you

- Basic information about the building, such as its purpose and location
- The volume of the property in cubic meters, if known.
- If not, we need to know at least the surface area of the premises to be disinfected.
- Required day and time of disinfection
